Boxley proudly produces high-quality aggregate, asphalt, block, brick, hardscapes, concrete, and slate products. Our products are essential in the construction of homes, schools, hospitals, buildings, and landscaping, as well as the maintenance and construction of roads and bridges throughout central and western Virginia.

MISSION STATEMENT
We deliver quality on every project, backed by our commitment to safety, service and reliability. It’s The Boxley Way.

VISION
We will be the industry leader in all facets of our business with the talent to sustain it.

COMPANY CORE BELIEFS
- Work safely.
- Hire and train the best people.
- Build long-term relationships.
- Provide opportunities for personal growth.
- Reward outstanding contributions.
- Be honest.
- Involve our employees in the decision-making process.
- Deliver quality from the ground up.
- Be active participants in our communities.
- Be responsible stewards of the environment.
- Commit to be a little better at what we do each and every day.
- Earn profits to support our corporate growth and beliefs.
AGGREGATE

Contractors and road builders count on Boxley aggregate as the foundation for project success. Our continued investment in manufacturing equipment and technology enables us to produce a wide variety of crushed stone, including granite, limestone, aplite, and greenstone. Simply put, our crushed stone is cleaner and more consistently graded than what you’ll find elsewhere.

BASE STONE

Classified by VDOT specifications #25, #26, 21A, and 21B. These products are used for stabilization beneath asphalt and concrete paving for parking lots and highways. Base stone can also be treated with cement.

OTHER MATERIAL

#1, #2, #3, #357, and #30 surge. Used for logging and farm roads as well as construction entrances where heavy truck traffic is needed in wetter than normal conditions.

AGRICULTURAL LIME

Used by farmers and homeowners to raise the PH level in soils to promote healthy fields and lawns.

RIP-RAP

Large rocks used along shorelines of rivers and lakes to help control erosion as well as drainage structures and sediment control channels/ditches. Rip-Rap is also used in landscaping. Classified by VDOT as Class A-1 (25-75 lbs), Class I (50-149 lbs), Class II (150-499 lbs) and Class III (500-1500 lbs).

FINE AGGREGATE/MANUFACTURED SAND

Consists of #10, #36 Grade A sand, #9, and B & C Slurry. The #10 and #36 Grade A sand are used in asphalt, concrete mixes, and applications that require sand. The #9 and B & C slurry materials are used for ice control to ensure better traction during inclement weather, surface treatment, and slurry applications on highways.

COURSE AGGREGATE

Consists of #5, #56, #57, #68, #78, and #8. These products are typically used in asphalt and concrete mixes, but can also be used for driveways and septic systems.

L-SERIES

Buckingham L-Series landscaping stone is the perfect finishing touch for a distinctive landscape. Unlike wood mulch, our L-Series is a crushed slate that has a .08% absorption rate which makes this product resistant to acids, sunlight fading, and the toughest environmental conditions. #2 (1” - 3 pieces), #5 (3/4” - 1 1/2” pieces), #57 (0.25” - 1 1/4” pieces), #8 (3/16” - 1/2”), #10 (trail dust - 3/16”). Great for driveways, walking paths, trails, parking lots, and more.

MIX DESIGN

Our VDOT-certified technicians are proficient in Superpave and Marshall Mix design methods for your VDOT, Municipal, Federal Highway, Airport, Parking Lot, or other custom project specifications.

PAVING

Boxley has the knowledge and experience to provide the expertise you need on a variety of asphalt paving projects.

SLURRY SEAL & MICROSURFACING

Slurry Seal is great for resurfacing parking lots, roads, highways, subdivisions, and more. Installation available in North Carolina and Virginia.
CONCRETE
Our Green Star-certified concrete plants are strategically located to assure delivery of quality Boxley concrete, on time and in spec. Our sizeable fleet, experienced personnel, and state-of-the-art dispatching ensure your quality concrete is set to be delivered precisely when you need it — day or night.

CONCRETE MIXES
We offer a variety of certified mixes and the technical know-how to create a customized mix for your job. All our plants offer hot- and cold-water capabilities to help keep your job on schedule — regardless of the season.

STANDARD MIXES
- 3,000-3,500 psi: Most commonly used for flatwork, footers, and foundations
- 4,000 psi: Most commonly used for slabs on grade and walls
- 4,500-5,000 psi: Most commonly used for projects where high strength is critical

SPECIALTY MIXES
- HI EARLY MIXES
  When design strength needs to be achieved in less than 28 days, our VDOT-approved Hi Early mixes will achieve design strength in 7 days — sometimes as few as 3 days. We pride ourselves in getting concrete design strengths faster to help get the customer on the job faster, improving project schedules.
- PMI MIXES
  We offer specialty mixes such as pervious concrete, colored concrete, large stone slab mixes, grout mix, flowable fill mix, and many others.

CONCRETE MASONRY UNITS
Boxley is the largest supplier and manufacturer of block in western and central Virginia. With gray, architectural, and fire-rated block available in an array of shapes and sizes, builders find what they need even when facing the most complex building projects.

BLOCK, BRICK & HARDSCAPES
Our vast selection of block, brick and hardscapes products provide quality, strength, and style for any residential or commercial building project. Our product expertise, outstanding service, and quick delivery make Boxley the go-to resource.

BRICK
From the standard to the hard-to-find, Boxley is the go-to resource for commercial and residential brick.

HARDSCAPES
Boxley provides a diverse selection of quality products to create a welcoming, outdoor living space.
BUCKINGHAM SLATE

Boxley is proud to offer Buckingham® Slate as the highest quality slate on Earth, full of rich black, gray and blue tones. This slate has outstanding mechanical strength, is resilient to the toughest environments, and supports the finest architectural designs. Buckingham Slate is guaranteed to last a lifetime and is all natural and non-toxic, making it LEED eligible. Buckingham is quarried and manufactured in Virginia, USA.

- Award of Excellence Residential
  - National Stone Institute
- Tucker Design Award
  - National Stone Institute for Buckingham County
- Library Award of Excellence Renovation / Restoration
  - National Stone Institute

ARCHITECTURAL
Raise the level of your architecture by using the premier choice slate that lets your designs stand out from everyone else’s.

HARDCAPES
Whether you’re using it as landscape mulch or in your driveway, Buckingham® Slate adds a refined touch to any outdoor space.

ROOFING
Install a roof that is resistant to acids, has a low absorption rate, and an expected lifespan of more than 150 years.

The Boxley Way

Safety is at the heart of The Boxley Way, our approach to doing business and serving our customers. Boxley’s safety culture is of the upmost importance to the company, reinforced by our safety leadership team, our drivers out on the roads, and our facilities operating under strict safety-first policies and procedures.

Greener.
Smarter.
Better.

Boxley 360 is our employee-led corporate responsibility program that underscores Boxley’s ongoing commitment to be an outstanding employer, business partner, and corporate citizen. It is designed to engage employees in decision-making situations and build pride in how the company operates. Boxley 360 focuses on our four pillars of Corporate Responsibility: employee communication, employee health/wellness, community outreach, and environmental sustainability.
