Want to build a net-zero home? Think with Logix

It pays to think ahead.

The smart home of tomorrow will create the energy it needs. With Logix, not only will your comfort levels be set to a new level, but your utility bills will be cut in half too.

Logix XtraComfort® Solutions
- Add your home with Logix XtraComfort solutions, which do double duty best in black. 4-1/2" thick and energy-efficient. They’re super simple to install and use.

Logix XtraComfort® Homes
- If you’re into the future and want to lead the charge, Logix XtraComfort homes are the obvious choice.

Logix Net-Zero Ready Homes
- Consider adding our exclusive renewable energy solutions to your home. Our Net-Zero Ready homes are designed to provide a home that will use less back in the grid instead of buying it.

Higher intelligence.
- Learn more about our smart solution family.
- Logix XtraComfort Logix®

Think of it like a magic mirror that can talk to other mirrors.

Logix Tx Series
- Consider adding our exclusive renewable energy solutions to your home. Our Net-Zero Ready homes are designed to provide a home that will use less back in the grid instead of buying it.

Irresistible peace of mind

- Frost Resistant
- Mold Resistant
- Crack Resistant
- Pest Resistant

*With Logix Tx Series

Energy Efficiency
- Thermal bridging allows energy loss
- Insulation gaps
- Insulation (R-Value) erodes over time

Sustainability, Safety & Disaster Resistance
- People’s lives — and entire towns and neighborhoods — have been destroyed by severe fires, hurricanes and earthquakes
- May contain adhesives and chemicals that could produce adverse long-term health effects through off-gassing (evaporation)
- Wood and moisture provide an ideal environment for mold

Health & Comfort
- The smarter technology
- No thermal bridging prevents energy loss
- Constant R-Value of up to R-28 for life
- The stronger technology
- Wind Protection — Wind-rated to over 300 mph
- Fire Protection — 4-hour fire rating
- Earthquake Protection — Engineering available for all seismic zones
- Moisture Protection — Does not
- The friendlier technology
- EPS and concrete are non-toxic, and do not emit toxic gases
- No nutrient source exists in structure for mold growth
- Outside noise reduced to a whisper
